

Christopher Folmar

Durham, NH | (207) 752-4119 | c.folmar@outlook.com | github.com/clfolmar

Technical Skills

Languages & Frameworks:

C#, Java, TypeScript, SuiteScript, Go, Ruby, Ruby on Rails, SQL, PostgreSQL, MySQL, NET/ASP.NET, LINQ, Entity Framework, JavaScript, jQuery, Angular, React, AngularJS, ES6, HTML(5), CSS, Git, Bootstrap, CI/CD, AJAX, JSON, Spring, MongoDB, WCF, WPF, VB, C++

Software & Tools:

ChatGPT, Claude, Gemini, Google AI Studio, n8n, VS Code, Cursor, Replit, Asana, NetSuite, WordPress, MS Visual Studio, Eclipse, Akeneo, Zapier, Guru, Docusaurus, Ephesoft OCR/RPA, GitHub, GitLab, Sitecore, TFS, SourceTree, Bitbucket, Jira, Confluence, IIS, SQL Server MS, Travis-CI, Contentful, Demandware (UXStudio/Business Manager), Customer.io, Chargify, Windward AutoTag, Adeptia, SharePoint, GeckoBoard

Certifications:

Demandware Developer I | Sitecore XP 8 Website .NET Developer | Ephesoft 4.0 Advanced Training

Professional Experience

Engineering Manager | Fullscript (March 2025 – Present)

Strategic Leadership & Business Impact

- ❖ Lead, manage, and mentor 3 teams of Software Engineers & IC's (onshore and offshore), fostering a high-performance engineering culture while ensuring technical excellence, scalability, and delivery of business-critical initiatives across Fullscript's \$1B+ eCommerce platform.

- ❖ Drive Fullscript's AI-First mission as the leader of Team GSD, a dedicated engineering team focused on optimizing workflows, streamlining operations, and embedding AI-driven tooling & automation across the company to enhance efficiency, reduce manual effort, and modernize legacy processes.

Technical Execution & Engineering Management

- ❖ Own the output and execution of multiple teams and concurrent project streams, ensuring high availability, performance, and quality in our Financial, Order, Fulfillment, Package Tracking, Inventory, Customer Success, and Catalog systems.

- ❖ Collaborate with Product, Design, Technical Leadership, and Executive Leadership to define and execute engineering roadmaps, ensuring strategic alignment between technical initiatives and business priorities.

- ❖ Manage engineering roadmaps and backlog prioritization, ensuring teams deliver high-impact solutions while maintaining agility and adaptability.

- ❖ Contribute technically while focusing on strategic decision-making, guiding architecture and engineering direction without being factored into direct project delivery timelines.

Process Optimization & Continuous Improvement

- ❖ Ensure teams are empowered, aligned, and structured for success, driving engineering best practices, technical mentorship, and continuous process improvements to scale engineering capabilities.

- ❖ Shape engineering processes, automation, and tooling strategies to enhance developer productivity, reduce technical debt, and streamline CI/CD workflows.

- ❖ Build, curate, and implement scalable and adaptable processes and frameworks that empower peer engineering leaders to drive consistency, optimize execution, and enhance collaboration across multiple teams and domains.

Technical Lead | Fullscript (March 2022 – March 2025)

Strategic Leadership & Business Impact

- Lead the re-architecture of Fullscript's backend pipeline, enabling cross-subsidiary operations and optimizing Order, Fulfillment, Inventory, and Financial workflows for a \$1B+ eCommerce platform.
- Spearhead the consolidation of two ERP and WMS systems, reducing operational costs and complexity.
- Partner with executive leadership to define technical roadmaps, architecture, and business strategy alignment.

Technical Execution & Engineering Management

- Oversee backend integrations and infrastructure scalability, ensuring high availability and performance.
- Architect and implement CI/CD pipelines, driving rapid, reliable software delivery with automation.
- Lead and mentor a team of 5 engineers (onshore and offshore), fostering engineering excellence.
- Drive cross-functional collaboration between Engineering, Product, and Operations.

Process Optimization & Continuous Improvement

- Identify and prioritize technical debt, improving platform stability and performance.
- Promote engineering best practices, coding standards, and security.
- Own and execute full lifecycle software development, ensuring long-term maintainability.

Technical Program Manager | Emerson Ecologics (Sep 2021 – Mar 2022)

- Directed multiple software and QA teams in delivering high-quality, scalable applications.
- Defined and oversaw the adoption of an enhanced Software Development Life Cycle (SDLC).
- Led engineering initiatives from discovery to release, ensuring alignment with business goals.

Lead Software Engineer | Emerson Ecologics (Apr 2021 – Sep 2021)

- Spearheaded development projects, managing full software life cycles.
- Led architecture discussions and ensured code quality through rigorous reviews.
- Drove process improvements to enhance team efficiency and product reliability.

Full-Stack Senior Software Engineer | Emerson Ecologics (Feb 2020 – Apr 2021)

- Designed and implemented full-stack solutions with optimized code and system integrations.
- Led engineering best practices and mentored junior developers.
- Built verification plans for quality assurance and system stability.

Additional Experience

Previous roles include Lead Solution Engineer (AI Foundry), Lead Full-Stack Software Engineer (Relianta, LLC), Full-Stack Software Engineer (PixelMEDIA, Inc.), and others.

Education

University of Southern Maine

Bachelor of Science in Computer Science, Minor in Athletic Coaching (2009 – 2015)

Key Competencies

- Full-Stack Development & Architecture
- Growing and Scaling Teams

- Technical Leadership & Mentorship
- Engineering Management & Project Delivery
- Stakeholder Communication & Collaboration
- Agile Methodologies & SDLC
- Project Management & Roadmap Planning
- Resource Allocation & Prioritization
- System Performance & Optimization
